SHOWROJEET CHUGH

showrojeet@gmail.com | +91-8482021833 | Chennai, India | Remote / Relocation Open

JUNIOR TRADER | CEX & DEX EXECUTION, TOOLING & ANALYTICS

PROFESSIONAL PROFILE

Quantitative Trader with hands-on experience executing and managing positions across centralized and decentralized venues, including order books, AMM pools, and concentrated liquidity positions. Proven track record building proprietary trading tooling, position trackers, reporting dashboards, and reconciliation workflows in Python and SQL. Strong quantitative foundation in probability, statistics, and data-driven decision-making, with demonstrated engagement in crypto and DeFi ecosystems. Self-directed and adaptable, comfortable operating with autonomy across time zones in a remote-first environment.

PROFESSIONAL EXPERIENCE

AquaFunded

Remote | December 2025 – Present

Proprietary Trader (CFD / Futures)

- Execute and manage live funded proprietary capital across crypto and derivatives markets on centralized venues (CEX), strictly adhering to max daily drawdown boundaries and capital preservation protocols.
- Deploy quantitative trading strategies focused on short-term momentum, volatility breakouts, and cross-asset spreads, monitoring positions, inventory, and P&L in real time to identify risks early and act on them.
- Conduct daily mark-to-market P&L attribution, risk-adjusted performance evaluations (Sharpe ratio, win rate), and trade blotter reconciliations in Python and Advanced Excel, maintaining zero risk rule breaches.

Funding Traders

Remote | August 2022 – November 2025

Quantitative Trader (CFD / Futures)

- Managed multi-asset derivatives portfolios executing directional and relative-value strategies across centralized order books, futures, swaps, and options within approved risk limits.
- Built and improved proprietary trading tooling: position trackers, reporting dashboards, hedging workflows, and reconciliation pipelines in Python (Pandas, NumPy) and SQL, reducing manual overhead by 40%.
- Analyzed market and execution data to quantify slippage sources, evaluate fill quality versus market benchmarks, and identify which strategies and venues were actually profitable.
- Engineered automated risk monitoring toolsets calculating real-time Greeks, margin utilization, and portfolio exposure, escalating anomalies early to senior traders and ensuring seamless desk continuity.
- Partnered cross-functionally with execution brokers, clearing counterparties, and internal stakeholders to optimize margin efficiency and ensure 100% operational desk continuity across time zones.

LATOKEN

Remote (France) | August 2021 – February 2022

Liquidity Support Manager (Trading Desk)

- Supervised 24/7 electronic crypto trading desk operations across rotational shifts, managing order book depth surveillance, liquidity routing, and spread markups across 50+ CEX trading pairs.
- Monitored real-time pricing feeds and counterparty quote integrity to eliminate cross-venue arbitrage gaps, maintain competitive bid-ask spreads, and manage settlement flows across centralized and decentralized venues.
- Directed cross-functional incident resolution and trade break analysis across exchange nodes, liquidity providers, and clearing endpoints, achieving 100% operational continuity under high market volatility.

Tech Point Solutions

Remote (France) | August 2020 – July 2021

Investment Analyst

- Designed real-time position tracking and telemetry dashboards using Grafana and InfluxDB to monitor multi-asset transaction flows, pricing latency, and portfolio throughput for senior desk heads.
- Spearheaded data pipeline modernization across cloud infrastructure (AWS/GCP), reducing trade reconciliation cycle times by 30% and reinforcing governance and internal control standards.
- Reconciled daily trades, transaction flows, and cash/margin balances across cloud-based portfolio systems, providing structured exposure reports and risk commentary to executive management.

StakTec GmbH (Internship)

Berlin, Germany | February 2019 – July 2019

Financial Analyst (Due Diligence)

- Conducted financial risk analyses, cost-benefit modeling, and operational due diligence across multi-asset investment portfolios, evaluating exposure sensitivities and risk control mechanisms.
- Established standardized audit trails, error-checking routines, and structured risk reporting frameworks across portfolio tracking systems, ensuring compliance with corporate risk governance standards.
- Synthesized complex market and exposure data into executive presentations and strategic briefs for Desk Heads, supporting portfolio optimization and risk allocation decisions.

SKILLS & EXPERTISE

Trading & Execution: CEX Order Books, DEX / AMM Pools, Concentrated Liquidity Positions, Futures, Swaps, Options, Spread Trading, Cross-Venue Arbitrage, Slippage Analysis, Fill Quality Evaluation, Market Making.

Quantitative & Analytics: Probability, Statistics, Machine Learning (Regression, Classification), Financial Modelling, Execution Data Analysis, P&L; Attribution, Risk-Adjusted Performance, Position Monitoring.

Tooling & Infrastructure: Python (Pandas, NumPy, Scikit-learn), SQL, Advanced Excel, Jupyter Notebooks, Grafana, InfluxDB, Cloud Infrastructure (AWS/GCP), Bloomberg Terminal, Reuters Eikon.

Crypto & DeFi: On-Chain Analytics, Solana (Jupiter, Orca, Drift), EVM DeFi (Uniswap, Aave, Curve), AMM / PMM Mechanics, Lending Protocols, Algorithmic Trading, Market Structure & Microstructure.

Languages & Core: English (Fluent), French (Conversational / Working), Hindi (Native), Tamil (Native); Remote-First Autonomy, Cross-Timezone Collaboration, Sound Judgment Under Pressure.

EDUCATION

M.Sc Corporate Finance | IESEG School of Management, Lille, France *2018-2019*

PGP International Finance & Derivatives | IIM-C, Kolkata, India *2017*

BBA Business Administration | IESEG School of Management, Lille, France *2014-2017*
